

CellTrak provides the industry leading Mobile Application Platform for Home and Community Care

About CellTrak Technologies, Inc:

CellTrak Technologies, Inc. is the leading provider of integrated mobile solutions for the Home Healthcare, Hospice, and Private Duty markets. Our patent pending Software-as-a-Service solutions run on GPS-enabled mobile devices (Android, BlackBerry, Brew, J2ME and Windows Mobile) connecting through our visit manager platform.

The CellTrak visit manager platform enables you to automate workflow, improve compliance and reduce operating costs. Imagine your patient data transmitted wirelessly from the point of care to our visit manager portal in real time. This allows the entire care team to view and/or use the patient's latest data to help improve overall patient outcomes.

Additionally with secure integration provided to clinical management and scheduling systems, CellTrak removes paper and manual processes for any agency looking to gain better accountability and compliance from their field staff. Any discipline including home care aides, nurses, doctors, therapists, chaplains, marketing personnel and agency management can use the service to deliver their visit info securely and effortlessly.

Why CellTrak?

- **Improve Compliance**
 - Field staff proof of visits via GPS, and visit records always match care plans
- **Increase Productivity**
 - Accurate real time visit data information plus paperless schedules, time sheets and visit records, all eliminate manual processes as well as stacks of paper
- **Provides Field Staff Safety**
 - Know where your staff members are at anytime and provide them with an integrated communications tool
- **Reduced Operating Expenses (Proven ROI)**
 - Reduce mileage and travel time reimbursements, eliminate missed visits, and reduce HR and payroll administrative processing time

Our Technology:

- Industry leading mobile healthcare solution, homecare technology platform and data management solution
- Configurable Software-as-a-Service (SaaS) solution with HL7, XML and direct connect interfaces
